

ambra table

A striking, decorative and luminous sculpture. The result of a desire for purity and honesty in both materials and manufacturing.

The unusual shape fills the environment with a vibrant light which reflects in the copper and cantera stone, as well as on its standing surface. A dimmable switch regulates the intensity of the light that comes out of the GU10 LED spot. It is not just about a new shape, but rather new light, a balance between material composition, and light function.

Cantera is a rock made out of volcanic ashes and lava. It is a stone broadly used in cities all over Mexico for structures and local architecture, since the prehispanic era and mainly during the colonial time.

please note: Lead times are subject to change. Variations in colour, texture, shape & size are natural characteristics of handmade products and should be expected. Images shown are representative, but may not indicate all variations in these characteristics.
